

Product Change Note

Date May 1, 2022

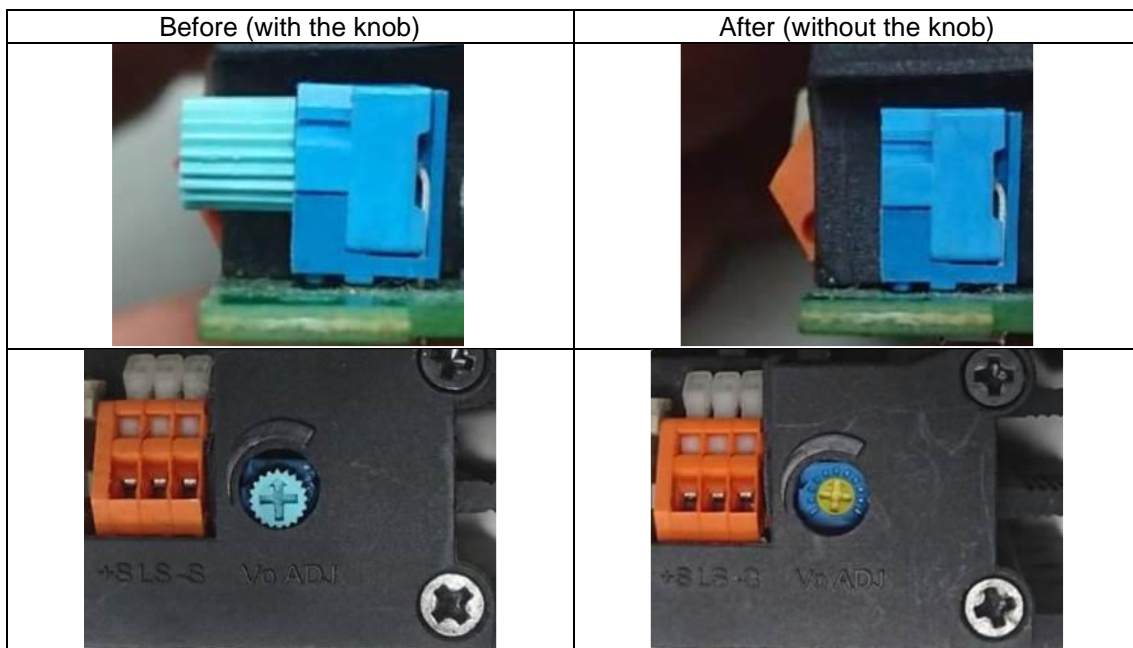

No. 033-22

TRACO POWER TEQ 300WIR

To whom it may concern

Component removal: Knob on output voltage adjustment trim potentiometer

Because of production optimizations we decided to remove the knob for voltage adjustment. This causes better lead times and has no effect on the electrical and mechanical specifications. The datasheet remains unchanged.

By removing the knob, the height for adjusting the output voltage decreased by about 5 mm. A screwdriver can still be used for output voltage adjustment; there is only a change in appearance.

Timeline:

The product change is active for all models since production date May 2022.

Datasheets and application notes are available on the respective product page for [TEQ 300WIR series](#).

For more information contact your local TRACO POWER sales representative.

We thank you for your understanding.
